ABOUT ME

Experienced Full Stack Software Engineer with 5+ years of delivering high-impact solutions for diverse industries. Proven track record of architecting scalable systems, leading technical migrations, and implementing AI-powered features that drive measurable business results. Successfully reduced operational costs by 60-70% and improved user engagement by 40-45%. Expert at identifying performance bottlenecks and implementing optimizations that significantly enhance user experience. Passionate about mentoring teams, establishing best practices, and transforming complex business requirements into elegant technical solutions that scale.

SKILLS

Backend: Nest.js, Express.js, Laravel, Core PHP, FastAPI

Frontend: Vue.js, React.js, Next.js, jQuery UI, Tailwind CSS

Databases: MongoDB, Redis, Memcached, MySQL, PostgreSQL

DevOps: Git, GitHub Actions, CI/CD, Docker, Forge, PM2

Cloud: AWS, DigitalOcean, GCP, Scaleway, Hetzner, Vercel

AI / ML: ChatGPT, Claude, AI Agents, fast.ai, Hugging Face, Redis Vector Search, Collaborative Filtering, Content Moderation

CMS: Strapi, Nova, Filament

APIs & Architecture: REST APIs, GraphQL, SOAP APIs, JWT, SSO, RBAC

Real-Time: Socket.io, Pusher, Livewire

Other: S3 Object Storage, Clean Code Advocate, Team Player, Problem Solver, Critical Thinking

EXPERIENCE

Full-Stack Developer — DA STUDIO

Dubai

February 2023 — Present

- Architected and scaled high-performance search systems using Meilisearch and Sphinx, reducing query response times by up to 60% and significantly improving content discoverability across high-traffic platforms
- Designed and implemented advanced geospatial features using Mapbox, including dynamic clustering and interactive popups, increasing user engagement by 35–40%
- Optimized backend performance through Redis caching strategies, SQL query refactoring, and indexing, achieving 30–40% faster page load times and improved system stability
- Led API modernization initiatives by migrating legacy SOAP services to RESTful architectures, improving maintainability, scalability, and third-party integration efficiency
- Owned deployment and DevOps workflows using Laravel Forge, automated backups, and CI/CD pipelines, improving release reliability and achieving 98% email deliverability
- Improved Core Web Vitals and SEO performance by eliminating layout shifts, optimizing asset delivery, and reducing render-blocking resources, resulting in faster load times and higher search rankings

Full-Stack Developer — IT FAQ

Dubai

August 2022 — February 2023

- Built and maintained scalable backend services using Nest.js, delivering well-documented REST APIs with Swagger and reducing frontend integration time by 50%
- Implemented real-time event-driven features using Pusher and Socket-based workflows, achieving 99% notification delivery reliability across web and mobile clients
- Engineered multi-language content management solutions with Strapi, enabling international expansion
- Integrated Meilisearch with CMS and Next.js applications, delivering up to 3× improvements in search relevance and response time
- Refactored vue.js forms into modular, maintainable components, reducing load times by 45% and improving overall UX consistency

Full-Stack Developer — HET

Istanbul

March 2020 — April 2022

- Developed internal admin dashboards using Laravel Nova, enabling stakeholders to manage data efficiently and make informed business decisions
- Implemented background job processing and cron-based automation for notifications and system tasks, increasing user re-engagement by approximately 40%
- Enhanced frontend interactivity with jQuery UI components, driving a 25% increase in user engagement for dynamic features
- Designed session-based personalization mechanisms to tailor user experiences, improving satisfaction and retention metrics by 30%
- Optimized database performance through query tuning and memory-efficient data access patterns, reducing average page load times by 35%

Java Backend Developer Intern — Enoca

Ankara / Karabük

June 2019 — September 2019

- Developed custom Java plugins using Spring Framework integrated into SAP Hybris Commerce
- Implemented business logic and services following SAP Hybris architecture patterns and Spring best practices
- Built custom extensions and modules extending Hybris core functionality using dependency injection
- Worked with Hybris data models, service layers, and facades to support e-commerce workflows
- Collaborated with senior engineers on catalog management and order processing features
- Improved platform stability through bug fixes and participation in code reviews

PROJECTS

Monlogement — Real Estate Management Platform

Advanced property listing platform with intelligent search and AI-powered recommendations using collaborative filtering and scam detection

Technologies: Laravel, Tailwind CSS, Meilisearch, Mapbox, MySQL, Redis Pub/Sub, FastAPI, fast.ai

- Implemented Redis caching and Pub/Sub communication improving performance significantly, achieving 50% faster page loads
- Deployed AI recommendation system using collaborative filtering that increased user engagement by 45% with 35% click-through rate
- Built automated scam detection system achieving 92% accuracy, reducing manual moderation workload by 70%

Blindlove — Anonymous Dating Application

Innovative dating platform featuring AI-powered intelligent matching using Redis Vector Search and Hugging Face transformers for semantic user profiling

Technologies: NestJS, Socket.io, MongoDB, Redis Stack, Redis Vector Search, Hugging Face Transformers, AWS, JWT, React.js

- Deployed Redis Vector Search achieving sub-50ms semantic matching queries at scale with 100K+ user profiles
- Integrated Hugging Face models for profile embeddings improving match quality by 40%
- Achieved 65% improvement in match relevance using vector embeddings compared to traditional methods

LeParking — Multi-Platform Automotive & Real Estate Marketplace

Enterprise-grade advertising platform serving major brands including JLR Group and Hyundai with advanced search engine

Technologies: Core PHP, MySQL, jQuery, Stripe, Monday CRM, Sphinx, Twig, Memcached, GraphQL, YouTube API

- Upgraded Sphinx search engine from v2.2 to v3.0, improving performance by 60% through migration to Sphinx SQL syntax
- Migrated legacy SOAP integrations to REST APIs, integrating insurance quotation systems, translation services, and CRM
- Built full-text search analytics tool improving overall search effectiveness by 40%

EDUCATION

Bachelor in Computer Engineering

Karabük University, Karabük

LANGUAGES

English, Turkish, Arabic
