ABOUT ME

Senior Full Stack Software Developer & Team Lead with 6+ years of experience architecting scalable web platforms and AI-driven systems. Proven expertise in NestJS, Laravel, and React, with a focus on modernizing legacy infrastructure and integrating high-impact AI capabilities like vector-based matching and automated moderation. A results-oriented leader who has reduced operational costs by up to 70% while mentoring engineering teams to deliver elegant, high-performance solutions that align technical architecture with complex business goals.

SKILLS

Backend: Nest.js, Express.js, Laravel, Core PHP, FastAPI

Frontend: React.js, Next.js, Vue.js, Tailwind CSS, jQuery

Databases: MongoDB, PostgreSQL, MySQL, Redis, Memcached

Search & Data: Meilisearch, Sphinx Search, TypeSense, Redis Vector Search

AI / Machine Learning: Hugging Face Transformers, fast.ai, Recommendation Systems, Content Moderation Models

Real-Time Systems: Socket.io, SSE, Redis Pub/Sub, Pusher

DevOps & Cloud: AWS, DigitalOcean, Vercel, Docker, PM2, CI/CD, Laravel Forge

EXPERIENCE

Full-Stack Developer — DA STUDIO

Dubai

February 2023 — Present

- Designed high-performance search systems using Meilisearch and Sphinx improving query response times and content discoverability.
- Implemented Redis caching and optimized database queries reducing backend latency and improving overall application performance.
- Led modernization efforts including framework migrations and backend architecture improvements for legacy systems.
- Reduced Time to Interactive (TTI) by architecting a code-splitting strategy and leveraging React Server Components for heavy data fetching.
- Improved Core Web Vitals and SEO performance by eliminating layout shifts, optimizing asset delivery, and reducing render-blocking resources.

Full-Stack Developer — IT FAQ

Dubai

August 2022 — February 2023

- Built and maintained scalable backend services using NestJS and PostgreSQL, delivering swagger documented REST APIs.

- Implemented TanStack Query background refetching to maintain real-time data freshness and a reactive client-side experience.
- Integrated payment systems including Stripe and PayPal with subscription management and webhook processing.
- Refactored legacy APIs into modern modular architecture improving maintainability and development speed.
- Boost response times and ensure content accuracy using Next.js ISR for static pages.

Full-Stack Developer — HET

Istanbul

March 2021 — April 2022

- Optimized rendering performance by implementing virtualization for large datasets and strategic memoization to minimize reconciliation overhead.
- Implemented background jobs and cron-based automation for system notifications and maintenance tasks.
- Architected a modular form system in Vue.js using Composables, improving overall UX consistency.
- Enhanced data integrity in Vue for complex multi-step form validation and error state management.
- Optimized database queries, indexing strategies and memory-efficient data access patterns improving application performance.

PROJECTS

Monlogement — Real Estate Management Platform

Property listing platform featuring advanced search capabilities and AI-powered property recommendations.

Technologies: Laravel, Meilisearch, Mapbox, Redis Pub/Sub, FastAPI, fast.ai

- Implemented advanced search filtering across geographic regions using Meilisearch.
- Deployed AI recommendation system using collaborative filtering with content-based metadata.
- Built automated GeoJson points transformer pipeline reducing manual transformation workload.
- Build batch processing system for agencies large ads importing through FTP.

Blindlove — Anonymous Dating Application

Anonymous dating platform implementing AI-powered user matching using vector embeddings and semantic profile analysis.

Technologies: NestJS, Socket.io, MongoDB, Redis Vector Search, Hugging Face Transformers

- Implemented Redis Vector Search for semantic profile matching improving match relevance.
- Designed hybrid matching algorithm combining weighted filters and vector similarity search.
- Built scalable real-time infrastructure supporting chat, notifications, and matchmaking services.

Roomco — Real-Time Social Platform

Real-time social networking platform with chat features and AI-powered moderation tools.

Technologies: NestJS, Socket.io, MongoDB, FastAPI, Redis Pub/Sub

- Led migration from Express.js to NestJS improving code structure and maintainability.
- Implemented AI-powered image moderation using FastAPI and machine learning models.
- Built scalable real-time messaging infrastructure supporting thousands of concurrent users.

EDUCATION

Bachelor in Computer Engineering

Karabük University, Karabük

LANGUAGES

English, Turkish, Arabic
